FOUR-FUNCTION SURGICAL TABLE

MORBROS • SURGICAL TABLE SYSTEMS

HEALEX 04

FOUR-FUNCTION ELECTRIC SURGICAL TABLE

Precision. Access. Versatility.

Compact, reliable and built for every surgery —
with smooth control, confident positioning
and complete C-arm compatibility.

C-ARM COMPATIBLE

Full radiolucent top for
unobstructed imaging.

MANUAL LEVER WHEEL-LOCK

Quick positioning.
Maximum control.

200KG CAPACITY

Strong. Stable.
Dependable.

SECTION 01

BUILT FOR EVERYDAY VOLUME

Healex 04 pairs a compact stainless-steel base with silent (<50dB) actuator motion — a dependable four-function table sized for high-turnover general surgery lists.

**SINGLE-CLICK ZERO POSITION****200KG LOAD CAPACITY, BALANCED C.G.****SINGLE-LEVER WHEEL LOCKING****GAS-SPRING HEAD SECTION, TOOL-FREE****ULTRA LOW HEIGHT, OPTIONAL****SLIDING TABLE TOP, OPTIONAL****SPECIAL FEATURES**

- Electric four-function control with a quick-access hand remote
- Zero function for rapid reset after procedures
- Compact stainless-steel base with an integrated actuator column for long life and easy cleaning
- Smooth, silent actuator motion (<50dB) suited to operation-theatre environments
- Gas-spring operated head section — smooth, tool-free adjustment in place of a traditional key-release mechanism
- Manual lever wheel-lock system for stable positioning during surgery
- Five-section radiolucent top for C-arm and imaging compatibility
- Anti-static, high-density PU mattress with seamless edges for infection prevention

SECTION 02

INTELLIGENT REMOTE & BUILT-IN SAFETY

03

Standard hand-held control remote

FOUR CORE FUNCTIONS

- 1 **Height** — raises or lowers the full table top
- 2 **Trendelenburg** — tilts head-down or head-up along the long axis
- 3 **Lateral Tilt** — rolls the table left or right
- 4 **Back Rest** — raises or lowers the back section independently

A dedicated **Zero** button returns the table to its home position from any combination of the above in a single press — useful for a fast reset between cases or an unplanned position change mid-procedure.

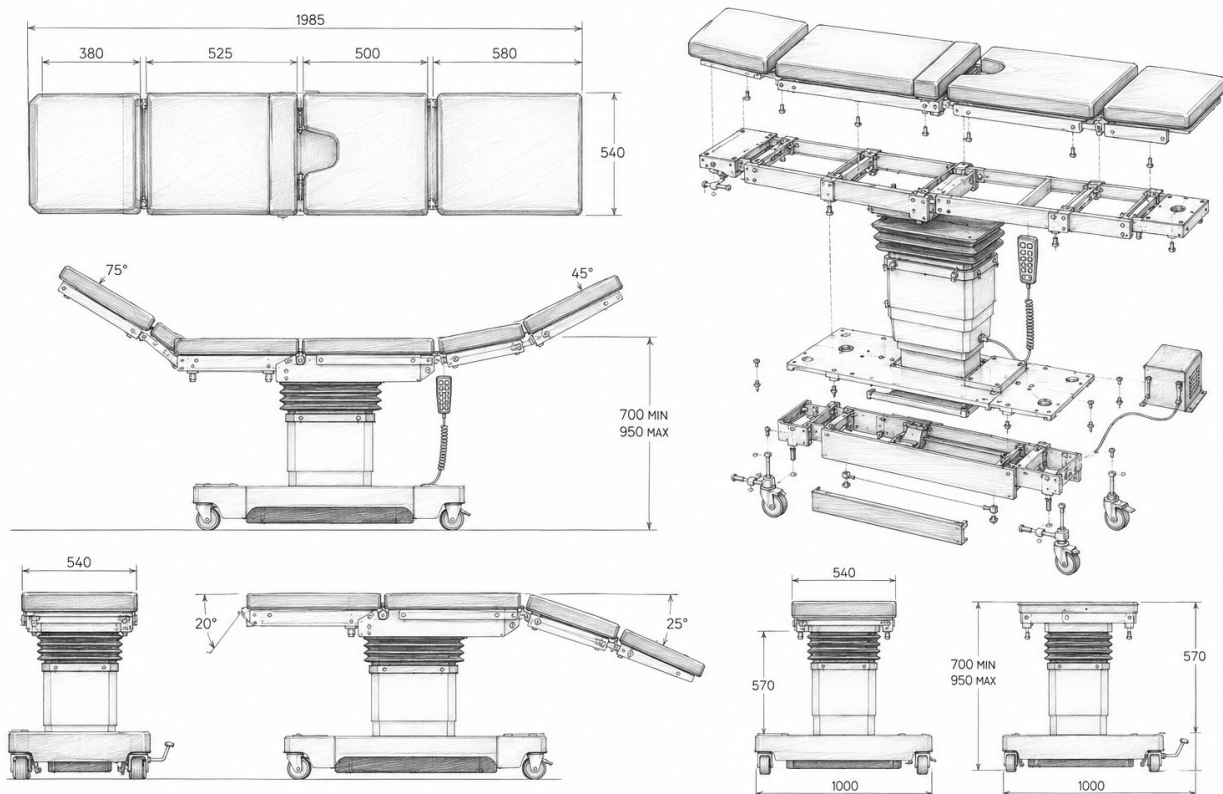

LONG-PRESS ACTIVATION

Every position command on the remote requires a **sustained long press**, not a single tap. A brief or accidental touch does nothing — the table only moves once a button is deliberately held. In a live OR, where a stray knock against the remote could otherwise shift the patient mid-procedure, this is a deliberate safety decision, not a convenience trade-off.

SECTION 03

ENGINEERED DOWN TO EVERY JOINT

Every Healex 04 is built to the same dimensioned drawing – from the five-section top and its dual-column actuator down to the wheel-lock base – so the table leaving the Morbros factory floor matches the engineering spec, unit for unit.

General arrangement & exploded assembly drawing – Healex 04

SECTION 04

TECHNICAL SPECIFICATIONS

05

PARAMETER	SPECIFICATION
Table length	1985 mm
Table width	540 mm
Min. height (without mattress)	700 mm
Max. height (without mattress)	950 mm
Kidney bridge	150 mm
Trendelenburg	25° up / 25° down
Lateral tilt	20° right / 20° left
Back section	75° up / 25° down
Leg section	20° up / 90° down
Head section	20° up / 90° down
Load capacity	200 kg, balanced center of gravity
Wheel locking	Manual, single-lever, engaged by foot
Actuator noise	< 50 dB
Table top	Five-section, radiolucent, C-arm compatible
Mattress	Anti-static, high-density PU, seamless edges
Remote control	Wired hand remote, 4-function, long-press activation, single-touch zero position

Additional charges will apply for specific customizations.

SECTION 05

CONFIGURE IT TO YOUR THEATRE

Healex 04 can be specified beyond the standard build with the following options:

EL manual override control panel

EL MANUAL OVERRIDE CONTROL

A dedicated override panel — height, Trendelenburg, lateral tilt, flex/reflex and top sliding — wired to a battery back-up, keyed and clearly marked **"only use in emergency."** If main power or the primary remote is unavailable mid-procedure, the table can still be repositioned safely.

Nurse panel

NURSE PANEL

A second control point for theatre staff, wired in alongside the primary hand remote. Each function — height, Trendelenburg, lateral tilt, back rest — sits behind its own lock icon and moves on simple left/right arrows once released, with two memory presets (M1, M2) and a Zero button of its own, so a saved position can be recalled without reaching for the surgeon's remote.

WIRELESS REMOTE CONTROL

The standard wired hand remote can be upgraded to a wireless remote for unobstructed movement around the table.

MATTRESS CUSTOMIZATION

Mattress colour can be customized to match theatre branding or department colour-coding, and a laminated mattress finish is available for easier cleaning and added durability.

Additional charges will apply for specific customizations.

SECTION 06

CERTIFICATIONS & COMPLIANCE

Healex 04 is manufactured on the same Delhi production floor and under the same quality system covered by Morbros India's regulatory certifications, audited under the Deutsche Akkreditierungsstelle (DAB) accreditation framework:

ISO 13485:2016 Medical Devices Management System Cert. MDS240271 · Valid to 18/02/2027	ISO 9001:2015 Quality Management System Cert. QMS240270 · Valid to 18/02/2027
IEC 60601-2-41:2021 Safety & performance — surgical luminaires Cert. IEC340722 · Valid to 08/07/2027	IEC 60601-2-40:2016 Safety & performance — EMG / evoked response equipment Cert. IEC240721 · Valid to 08/07/2027
CE CERTIFIED Per Directive 93/42/EEC (Annexure I) Cert. CE240272 · Valid to 18/02/2027	GMP CERTIFIED Good Manufacturing Practice Cert. GMP230860 · Valid to 29/08/2026

Certificate numbers and validity dates as of original issue; ask your Morbros representative for current renewal status before publishing to a regulated market.
